MOST RECENT WORK EXPERIENCE

Senior Frontend Developer - Freelance

Jun 2023 – Present · GridUnity [Energy Technology, B2B]

RESPONSABILITIES

- Analysis and development of web applications using Vue.js, including implementing and utilizing Storybook for efficient creation, documentation, and testing of UI components.
- Migration of legacy projects, upgrading systems from Vue.js v2 to v3 to improve security, and compatibility with modern technologies.
- In charge of technical interviews as an evaluator, where problem solving skills, algorithm design and technical knowledge are analyzed to identify suitable talent for the software engineering team.

KEY ACCOMPLISHMENTS

- Obtaining official Vue.js certification.
- Creation of components library with +20 components based on Radix UI and Shadcn.

Software Designer at Globant

Jan 2020 – May 2023 · TaxAct [Tax Filing, B2C]

RESPONSABILITIES

- Creation of web applications based on Nuxt/Vue for the company's marketing team.
- Migration of the authentication system using AWS Cognito.
- Development of a RESTful API service based on NodeJS integrated with a Headless CMS that allows the marketing team to update the page content in real time.
- People management with up to five direct reports with diverse levels of seniority.
- In charge of the interviews of the applicants for the position of front-end developer.
- Coach and mentor developers about the source code of the projects, the architecture and communication of the applications.

KEY ACCOMPLISHMENTS

- Increased website speed migrating from a legacy system made in .NET to one using Vue and Nuxt using SSR strategy.
- Fit five front-end developers in 2 months, leading and mentoring the team throughout the year of the project.
- Improved the efficiency of my team by reducing the migration time of internal pages from 5 to 10 per sprint, promoting pair and group programming, and an experimentation mindset.

Senior Frontend Developer at Belatrix

Sep 2017 – Jan 2020 · Innovation Center of BCP [Bank and Finances, B2C]

RESPONSABILITIES

- Effectively coded software changes and alterations based on specific design specifications.
- Development of web applications using Angular integrating with the bank's APIs.
- Development of templates for sending emails for marketing campaigns.
- Development a design system to be used for future web applications in the company.
- Participate and collaborate in A/B Testing sessions for bank users.

KEY ACCOMPLISHMENTS

- Launched of INVIERTEFACIL BCP, a financial web solution used by more than 20k users per month to make fixed-term deposits.

Full Stack Developer at Seek

January 2017 – August 2017 · [Marketing, B2C]

RESPONSABILITIES

- Analysis and development of web applications using Angular and TypeScript.
- Back End development with Node JS/Express and Python/Django.
- Mailing integration using SendGrid.
- Implementation of SEO techniques and strategies to improve search engine positioning.

KEY ACCOMPLISHMENTS

- Launched of LAPOLLA TE APUESTO, an application to forecast the 2018 World Cup matches.
- Redesign of the LA TINKA website, the most important betting house in Peru.
